Information on Appendix Registers:

The Appendices are, in effect, grading-up registers for ponies of unknown lineage. Progeny from Appendix mares by fully registered and licensed Highland stallions will be inspected and registered as follows. All colts must be gelded. Gelded progeny of Appendix A and Appendix B mares will be placed on the register of their dam. Fillies, on passing inspection by a judge from the Highland Pony Society's In Hand Panel, will be advanced to the next register; if they fail they will be left on their dam's register. Fillies and geldings of Appendix C mares, if passed, will be registered on the full register.

Inspection Form for Registration of Progeny from Appendix Mares

Breeders should complete and sign this form ready for the inspecting judge's visit. Once inspected, the form should accompany the foal registration application. There is no additional fee from the Highland Pony Society and breeders should make their own arrangements with the inspecting In Hand Judge.
