

Loan Transfers

Having a Highland Pony Society Loan Transfer in place allows the keeper of the pony to exhibit and breed (using their own prefix) as if they are the pony owner. Mares on loan for breeding purposes must be recorded as such by completing a loan transfer BEFORE progeny can be registered in the borrower's name.

- The Loan Transfer form MUST be signed and dated both by the LENDER(S) and BORROWER(S) of the pony.
- Registration documents need not be sent to the Society with loan applications but the appropriate fee must be included.
- The borrower of a pony will be accorded the rights of the owner by the Society and will be recorded as the keeper of the pony.
- On completion of a loan, the Highland Pony Society should be informed and the keepership will revert to the registered owner. There is no charge for this.

It is recommended that, when loaning a pony, a commercial loan agreement is also signed by both parties. A template for this is available on the British Horse Society website: <https://www.bhs.org.uk/advice-and-information/horse-ownership/loaning-a-horse>. This agreement will cover details such as veterinary treatment, field maintenance, visiting rights and the anticipated date of loan completion. It can be personalised to each owner and borrower's situation.
